JOURNAL OF PLASMA PHYSICS

VOLUME 57
1997

CAMBRIDGE
UNIVERSITY PRESS

EDITORS

PROFESSOR R A CAIRNS, *School of Mathematical and Computational Sciences, University of St Andrews, St Andrews, Fife KY16 9SS, Scotland, jpp@st-andrews.ac.uk*

PROFESSOR GEORGE H MILEY, *Fusion Studies Laboratory, University of Illinois, 103 S Goodwin Avenue, Urbana IL 61081–2984, USA, g-miley@uiuc.edu*

ASSOCIATE EDITORS

DR ROBERT L BINGHAM, *Space Science Department, Rutherford Appleton Laboratory, Chilton, Didcot, Oxfordshire OX11 0QX, England, rbi@vk.rl.ac.uk*

DR MARCO BRAMBILLA, *Max-Planck-Institute für Plasmaphysik, Postfach 1533, D-85740 Garching, Germany, mab@ipp-garching.mpg.de*

PROFESSOR ERYK INFELD, *Soltan Institute, Hoza 69, PL-00681 Warsaw, Poland, Eryk.Infeld@fuw.edu.pl*

PROFESSOR P K KAW, *Institute for Plasma Research, Bhat, Gandhinagar 382 424, Gujarat, India, Kaw@plasma.ernet.in*

PROFESSOR D B MELROSE, *Research Centre for Theoretical Astrophysics, School of Physics, The University of Sydney, Sydney NSW 2006, Australia, melrose@physics.su.oz.au*

PROFESSOR EDWARD C MORSE, *Nuclear Engineering Department, University of California Berkeley, Berkeley CA 94720, USA, Morse@nuc.berkeley.edu*

DR RICHARD A NEBEL, *T-15, Los Alamos National Laboratory, MS K717, Los Alamos NM 87545, USA, rick@ctrss2.lanl.gov*

PROFESSOR G J PERT, F.R.S., *Department of Physics, University of York, Heslington, York YO1 5DD, England, gjp1@redeyes.york.ac.uk*

DR PADMA K SHUKLA, *Institut für Theoretische Physik IV, Ruhr-Universität Bochum, D-44780 Bochum, Germany, ps@tp4.ruhr-uni-bochum.de*

DR GARY P ZANK, *Bartol Research Institute, University of Delaware, Newark DE 19716-4793, USA, zank@bartol.bartol.udel.edu*

Dr John P Dougherty, Founding Editor, 1967–1994

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published eight times a year in January, February, April, May, July, August, October and November, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011-4211.

Four parts form a volume. The subscription price (excluding VAT, but includes postage) of Volumes 57 and 58 (1997) is £356.00 (US $640.00 in the USA, Canada and Mexico) for institutions; £199.00 (US $380.00) for individuals. Single parts cost £49.00 each (US $88.00 in the USA, Canada and Mexico) plus postage. All orders must be accompanied by payment.

EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number.

Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air.

Copies of the journal for subscribers in the USA, Canada and Mexico are sent by air to New York to arrive with minimum delay. Periodicals postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA, Canada and Mexico to *Journal of Plasma Physics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573–4930.

Information on *Journal of Plasma Physics* and all other Cambridge journals can be accessed via http://www.cup.cam.ac.uk/ and in North America via http://www.cup.org/.

CONTENTS TO VOLUME 57

Part 1 January 1997

The Earth's plasma sheet as a laboratory for flow turbulence in high-β MHD
Joseph E. Borovsky, Richard C. Elphic, Herbert O. Funsten and Michelle F. Thomsen 1

Transition to turbulent electric current sheet reconnection
Russell B. Dahlburg 35

Plasma sheath evolution from perturbed electrodes in a negative-ion plasma
Yasser El-Zein, Seungjun Yi, Karl E. Lonngren, Igor Alexeff, Terrence E. Sheridan and H. Hsuan 47

Remarks on statistical mechanics of discrete and continuous media with application to the magnetohydrodynamic dynamo
Leaf Turner 59

Magnetohydrodynamic equations under anisotropic conditions
R. Kinney and J. C. McWilliams 73

Reduced MHD in nearly potential magnetic fields
H. R. Strauss 83

On general transformations and variational principles for the magnetohydrodynamics of ideal fluids. Part III. Stability criteria for axisymmetric flows
V. A. Vladimirov, H. K. Moffatt and K. I. Ilin 89

Thermal conduction in strongly coupled plasmas: especially liquid alkali metals
N. H. March and M. P. Tosi 121

Anisotropy in Hall MHD turbulence due to a mean magnetic field
S. Ghosh and M. L. Goldstein 129

K–ϵ compressible 3D neutral fluid turbulence modelling of the effect of toroidal cavities on flame-front propagation in the gas-blanket regime for tokamak divertors
George Vahala, Linda Vahala, Joseph Morrison, Sergei Krasheninnikov and Dieter Sigmar 155

Entropy, fluctuation and transport in lattice gas systems with generalized semi-detailed balance
Hudong Chen 175

Inhibition of turbulent cascade by sweep
Shiyi Chen and Robert H. Kraichnan 187

Energy spectrum in the dissipation range of fluid turbulence
D. O. Martínez, S. Chen, G. D. Doolen, R. H. Kraichnan, L.-P. Wang and Y. Zhou 195

Experimental evidence of rapid relaxation to large-scale structures in turbulent fluids: selective decay and maximal entropy
Michael R. Brown 203

Viscous drag and the differential rotation of the Earth's core
David L. Book and J. A. Valdivia 231

Part 2 February/March 1997

Kinetic Alfvén solitons in a low-beta plasma
B. C. Kalita and R. P. Bhatta 235

Effect of a stochastic electron background on low-m tearing modes
P. V. Siva Rama Prasad and D. P. Tewari 247

Quasiparticle invariants and energy transfer between particles and fields
Petro P. Sosenko 259

Derivation of an equation for three-wave interactions based on the Klimontovich–Dupree equation
V. I. Erofeev 273

Nonlinear propagation of lower-hybrid waves in a dusty plasma
O. P. Sah 299

Nonlinear effects in Alfvén resonance
I. S. Dmitrienko 311

Stability analysis of the ideal $m = n = 1$ kink mode in toroidal geometry by direct expansion of the hydromagnetic equations
C. Wahlberg and A. Bondeson 327

Evolution of magnetic moment in the interaction of waves with kinetically described plasmas
Chandra Das 343

Quasi-optical description of reflection focusing and plasma cut-offs of electron cyclotron Gaussian beams
S. Nowak and A. Orefice 349

Plasma stochasticity and modulational interactions of waves associated with lower-hybrid resonance
S. I. Popel 363

A nonlinear theory of charged-particle stopping in non-ideal plasmas
Yu. S. Sayasov 373

Generation of Bernstein modes in space and laboratory plasmas by injection of an electron beam
Georgyi V. Lizunov 387

Arbitrary potential drops between collector and emitter in pure electron diodes
HEIDRUN KOLINSKY and HANS SCHAMEL 403

New classes of three-dimensional ideal-MHD equilibria
R. KAISER and A. SALAT 425

Power thresholds of the L–H transition described by a global bifurcation of tokamak equilibrium
E. MINARDI 449

Bohm sheath criteria and double layers in multispecies plasmas
FRANK VERHEEST and MANFRED A. HELLBERG 465

Covariant form of Trubnikov's response tensor for a relativistic magnetized thermal plasma
D. B. MELROSE 479

BOOK REVIEW
Astrophysical Fluid Dynamics, by E. Battaner 489

PART 3 APRIL 1997

Solitary waves and corresponding double layers in relativistic plasmas with multitemperature electrons
G. C. DAS and K. M. SEN 491

On the possible role of anomalous resistivity in POS
A. KINGSEP and A. MUNIER 501

Evolution of a preformed electron beam propagating through a conducting cylinder
HAN S. UHM 515

Two-stream cyclotron radiative instabilities due to the marginally mirror-trapped fraction of fusion alphas in tokamaks
V. ARUNASALAM 523

Diamagnetic effects during the early stages of star formation
H. U. RAHMAN, D. BHATTACHARYA, S. RAJPOOT and P. AMENDT 535

Excitation of upper-hybrid waves by a rotating relativistic electron beam in a plasma-filled large-orbit gyrotron
S. C. SHARMA 545

Role of higher spatial harmonics in the launched LH spectrum in the ponderomotive effects at the plasma edge
J. PREINHAELTER, L. VAHALA and G. VAHALA 555

A novel construction of the response tensors for a collisionless unmagnetized plasma
D. J. PERCIVAL 575

A modal view of oscillations in inhomogeneous compressible MHD
P. S. Cally and S. T. Maddison 591

Spectral dependence, efficiency and localization of non-inductive current drive via helicity injection by global Alfvén waves in tokamak plasmas
K. Komoshvili, S. Cuperman and C. Bruma 611

Wave–wave interactions in two-fluid cosmic-ray hydrodynamics
G. M. Webb, M. Brio, G. P. Zank and T. Story 631

Cosmic-ray-modified shocks with injection in the hydrodynamic approach. Part 1. Injection linear in the thermal pressure
Chung-Ming Ko, Kai-Wing Chan and G. M. Webb 677

Book Review
Force Free Magnetic Fields, Solitons, Topology and Applications, by G. E. Marsh 695

Part 4 May/June 1997

Effect of beam density on nonlinear amplification of inverse-bremsstrahlung electron acceleration
A. C. P. Paes, M. Virgínia Alves, R. M. O. Galvão, A. Serbeto and M. S. Hussein 697

Relativistic kinetic theory of waves in isotropic plasmas
Reinhard Schlickeiser and Meinhard Kneller 709

Solutions of the hydromagnetic equation with magnetic null points: uniform-resistivity case
F. Jamitzky and M. Scholer 741

Fundamental plasma radiation generated by a travelling Langmuir wave: hybrid stimulated modulational instability
Abraham C.-L. Chian and José R. Abalde 753

Variational principle for crossed-field devices
D. J. Kaup and Gary E. Thomas 765

Particle acceleration by large-amplitude waves revisited
R. Pakter, G. Corso and F. B. Rizzato 785

The influence of trapping effects on neutron production in NBI-heated tokamak plasmas
B. Wolle, Z. Jauch and L.-G. Eriksson 793

Resistive effects on helicity-wave current drive generated by Alfvén waves in tokamak plasmas
C. Bruma, S. Cuperman and K. Komoshvili 805

Exact wave solutions for a cylindrically bounded magnetized plasma
G. Murtaza and M. Y. Yu 835

Effects of electron-beam denisity on large-amplitude ion-acoustic waves in a plasma with trapped electrons
Y. N. Nejoh 841

The effects of propagation angle of waves and pitch angle of electrons on maser and beam–plasma instabilities
Guang-Li Huang, De-Yu Wang and Ding-Yi Mao 851

Normal and anomalous explosion mechanisms for nonlinear instabilities in three-wave coupling
Ding-Yi Li, Ding-Yi Mao and De-Yu Wang 861

Corrigenda 875
